

MANUFACTURING INDUSTRY

MEETING THE CHALLENGES OF TODAY'S MANUFACTURING INDUSTRY

There are many challenges facing the manufacturing sector today, which is constantly being transformed and reshaped by a myriad of risk factors. The dynamics of geopolitical relationships and competition, coupled with regulatory social and environmental pressures as well as shifts in supply and demands are some of the elements causing changes in the industry. Despite these factors, manufacturing sub-sectors (i.e., textiles, beverages, food, electronics, and metals) will continue to expand in response to the growing needs of populations, companies, and individuals.

As the operational, security, and risk profiles of companies transform, consideration must be given to being proactive in order to maximize awareness and identify and manage risk. Additional challenges faced by the manufacturing sector include managing suppliers and third-party vendor relationships, especially in emerging markets where the prevalence of corruption and bribery is high. As a result of strong competition, coupled with pressure to lower prices and maximize production, the manufacturing sector must rely on the most up-to-date intelligence in order to make coherent business decisions for the short-, mid-, and long-term.

Odin Enterprises leverages deep expertise in Human Intelligence collection through on-the-ground networks to implement sustainable solutions to curtail the risks that the manufacturing industry faces and to provide the real-time intelligence necessary in even the least transparent markets.

ODIN ENTERPRISES' VALUE BASED SOLUTIONS FOR THE MANUFACTURING INDUSTRY:

- Management of the due diligence process
- Coordinate information dissemination, site visits, and management presentations
- Transaction and partnership structuring and execution
- Country, market, and competitive studies
- Global reach and local insight in hard-to-penetrate markets
- Timely, relevant, and actionable information
- Cost-effective, custom fit, and scalable solutions

ODIN ENTERPRISES : UNLOCKING THE POWER OF INFORMATION

ODIN Enterprises is committed to being your partner in these challenging times. We have the resources to provide sustainable, reliable, timely and most importantly, actionable solutions at a fraction of the cost of expanding your internal team. We leverage internal industry, sector, and regional expertise, in order to understand your specific manufacturing issues and concerns. We have the ability to access hard to reach markets by leveraging Human Intelligence and innovative Cyber Solutions through an extensive and fully vetted proprietary network of global sources.

SERVICES

The broad categories of services provided to minimize client risks and maximize awareness for the manufacturing industry include:

GLOBAL INVESTIGATIONS

- Investigative Due Diligence
- Bribery and Corruption
- Reputational Assessments
- Compliance Investigations
- M&A Due Diligence
- Competitive Intelligence
- FCPA Compliance Investigation
- Third-Party Vendor & Partner Vetting
